On Aug. 1, E-Verify will begin deactivating user IDs that have not been accessed for 270 days (approximately every 9 months).

How can I avoid deactivation of my user ID?

Log in to E-Verify with your user ID at least once every 270 days.

What should corporate administrators and Program Administrators do before Aug. 1?

They should:

- Log in to E-Verify before Aug. 1 if they have not accessed E-Verify for 270 days.
- Review all user IDs for their company account to determine if E-Verify access is still required for any of those users.
- Terminate any active user IDs that no longer need access to E-Verify.

What should General Users do before Aug. 1?

Log in to E-Verify with your user ID at least once every 270 days.
