### USCIS Launches H-1B Employer Data Hub

USCIS has launched an [H-1B Employer Data Hub](#) to provide information to the public on employers petitioning for H-1B workers. The data hub is part of our continued effort to increase transparency in employment-based visa programs by allowing the public to search for H-1B petitioners by fiscal year (back to FY 2009), [NAICS code](#), employer name, city, state, or ZIP code. This will give the public the ability to calculate approval and denial rates and to review which employers are using the H-1B program. Data for individual fiscal years is available to download on the [H-1B Employer Data Hub Files page](#).

To help the public use the data hub and understand the terminology in it, we have also created the [Understanding Our H-1B Employer Data Hub page](#).

We will provide cumulative quarterly updates and annual releases of the data and we anticipate updating the H-1B Employer Data Hub quarterly. For example, data for the first quarter (October-December) of a fiscal year will be provided in April of that fiscal year.

The [H-1B program](#) allows employers in the United States to temporarily employ foreign workers in occupations that require the theoretical and practical application of a body of highly specialized knowledge and a bachelor's degree or higher in the specific specialty, or its equivalent.
